

Sample PDF for RAG Testing

Introduction:

This PDF is created solely for the purpose of testing Retrieval-Augmented Generation (RAG) features in large language models (LLMs). The content here is straightforward and generic.

Section 1: Overview of RAG

RAG combines retrieval of relevant documents with language generation. It helps improve accuracy and factuality by grounding the generation in external knowledge sources.

Section 2: Sample Text

The quick brown fox jumps over the lazy dog. This pangram contains every letter of the English alphabet, making it useful for font and testing purposes.

Section 3: Numbers and Facts

- Pi (π) is approximately 3.14159
- The speed of light is about 299,792 kilometers per second
- Water boils at 100°C (212°F) at sea level

Section 4: Conclusion

Feel free to query this document using your LLM with RAG capabilities to verify how it retrieves and utilizes the information contained within.
